

Environmental Management Policy

Geonewmedia has developed an Environment Policy as part of our Safety, and Environmental Management System.

Geonewmedia is commitment to minimising the impact of its operations on the environment to a statutory and socially acceptable level through the pro-active implementation, maintainance, and continuous improvement of our Environmental Management System.

Geonewmedia aims to protect human health, reduce our impact on the ecosystem and minimise disturbance to natural vegetation and habitats.

This is a shared commitment between the business managers, supervisors, employees, contractors, suppliers and other concerned parties. It supports the rights of all parties to express their concerns about the workplace environment and expects those concerns to be addressed.

To enable the above environmental objectives to be achieved Geonewmedia will:

- 1 Promote a safe environment in our productions and give the environment the same importance as other key considerations;
- 2 Comply with all relevant legislation, regulations, codes and contractual conditions;
- 3 Prevent pollution of the environment by activities over which we have control;
- 4 Conduct business with others who have a similar environment commitment;
- 5 Continually improve the management off the environment by setting realistic objectives and targets;
- 6 Endeavour to re-use and re-cycle materials, where possible, and dispose of waste in an appropriate manner whilst protecting the environment from any such re-use, re-cycle or disposal.
- 7 Educate every employee on their responsibility to minimise their impact on the environment, to ensure that they are aware of the environment requirements, and to raise any environmental issues or concerns.
